3D Visualisation Artist and Illustrator with key skills in virtual 3D modelling and visualisation (3D studio Max) and technical illustration, as well as broader graphical work. Extensive experience of system and facility design for military and construction sectors in addition to more mainstream work for commercial sector. Also a skilled creative and technical writer focussed on proposal generation, report writing, support publications and marketing/ business development creative copy.

Please see [www.creativityunlimited.co.uk](http://www.creativityunlimited.co.uk) for further details.

Key experience summarised as follows:

**Virtual 3D Modelling** Vast experience creating rapid-turnaround, detailed visualisations and animations for a broad range of subjects, allowing clients to showcase highly realistic concepts prior to making key decisions, or before committing the time, cost and resources necessary to effect production. I carry 12 years broad industry experience covering many subject disciplines including engineering (vehicles, civils & construction), product design & development, property, facilities and large scale system design.

**2D & 3D Illustration & Graphics** Over a decade of industry experience creating casual, traditional and technical illustrations plus diagrams, complex graphics and mapping. Illustration and graphics expertise includes cutaways, ghosting, image manipulation plus formal drawings and GA drawing sets. Broad graphic design experience creating specific pieces for presentation and corporate needs. Extensive system design experience covering facility design, deployable infrastructure and vehicle platforms. Formally trained in technical illustration discipline.

**Proposal Writing** Extensive turnkey proposal generation skills & experience (multi-sector), from small scale bid work to large multi-million pound tenders; including requirement analysis, response generation, graphics, concept mock-ups, costings, third party supplier management, commercials, red team review etc. 10 years experience of comprehensive and high quality bid response creation against military, Government, NGO, large multinational and mainstream commercial requirements in many forms.

Creative Document Writing Significant cross-sector experience preparing creative text copy for marketing, sales and business development purposes for use in all client facing materials, websites, presentations plus marketing and proposal documentation.

Technical & Support Documentation Extensive technical understanding with associated technical documentation skills due to engineering background, with significant exposure to vehicle, facility & infrastructure sectors. Experience creating top-grade turnkey support documentation (all content - graphics and text copy) including vehicle and product op & maintenance guides, installation guides and spares manuals etc.
