Nordic Moments of Light

PHOTOGRAPHY/VISUAL ARTS

This page is dedicated to my photographic work; showing some of those precious moments of light that have found its way through my lens. Being an avid user of classic/vintage cameras, a rather large proportion of this portfolio shows the influence and trademarks of analogue film. Some of my work is available through www.arcangel.com and more will be added. By profession I am a freelance art director and graphic designer.

Working methods

I prefer using analogue film and cameras from 1930 to mid 80's. Working this way yields, in my humble opinion, results that possess a subtle warmth and nimbleness - making it well worth the extra effort. Having said that, I work comfortably with digital equipment.

Even though I'm mostly occupied with practicing my profession as a freelance art director/graphic designer, photography has always been a very strong interest and important source of inspiration.
