ABOUT Hi,

My name is Alex Kuzyuberdin (don't bother to read my last name :) and I am graphic designer.

I grew up in a small town on the Black Sea coast and as long as I remember I've been fascinated by art and drawing. This led me to the Kids Art School in Novorossiysk and then to Rostov State Academy of Architecture and Fine Arts (6 years full time program) from which I graduated with a degree in architecture.

I moved to Canada, Vancouver 3 years ago and took certificate program at Emily Carr University of Art and Design, which I completed in spring 2010.

I have good drawing skills, not good enough to be professional artist but much better than most modern graphic designers have. I used to work for many years for outdoor advertising agencies and have good understanding of signmaking business. I worked both on Mac and PC and familiar with lot's of programs including Adobe Illustrator, Corel Draw, Photoshop, 3d Max, Dreamweaver,Flash.

Write me a couple of lines if you have any position for me, or you think I might be helpful in freelance assignments, or you have any comments, or if you are bored
