I Design products and furniture.
Visualizing the design with 3D models as well as Cad drawings.

LinkedIn Profile

Stig Stabell

Experience

Technical Project Manager

Unisport Scandinavia AS

Bergen
Oct 2017 - Present

Projecting sports equipment into sports halls using programs like Revit, Inventor, AutoCAD.
Working with Architects, Engineers, and entrepreneurs to give the customer the most sufficient and well-functioning facilities. Trough technical drawings in 2D as well as 3D-modells (rvt. and IFC) the interior is described to give the collaborators the exact knowledge and information about our installation.

Cabinet Maker, Furniture designer

Interiørsnekkeriet

Bergen
Sep 2015 - Sep 2017

I do interiors and furniture. From the creative start at the drawing board to final product. Visualizing in 3D give the customer a feel of how the final object look like. Design and making is close, resulting in a product with ballance and depth.

Product Designer

Bygg og Ventilasjon AS

Bergen, Norway
Jul 2013 - Jun 2015

As a Product Designer I use CAD, make prototypes and looking for the total picture - to make our customers look at their product with new eyes. Exploring new territory, then summarize and draw knowledge of new and unexpected findings.

Our machinery include CNC and laser as well as welding equipment and sheet metal bending machines.

We work with both offshore and onshore industry, from big projects on oil rigs to domestic products.
Most of our projects are custom made, but we do have products developed in our workshop ready-made.

Product Designer

Offshore Simulator Centre AS

Ålesund, Norway
Jun 2011 - Jun 2013

OSC is the worlds most advanced provider of simulators for Anchor Handling and Platform Supply Vessel operations.

We are able to achieve this due to high level operational know-how from the maritime cluster here in Norway mixed with advanced computer technology, sophisticated mathematical models and state of the art 3D graphics display systems. This includes complete offshore vessel bridges with all relevant controls and systems. Using intelligent software and interfaces we are able to produce solutions where we can change the vessel’s environment including altering the weather, winds, waves and time of day at the touch of a button.

Furniture/Interior Designer

Stig Stabell Design

Bergen, Norway
Jan 2005 - Mar 2020

Working with domestic one-off furniture and interior. Taking the project from idea to finished product. Going through a design prosess involving the customer to meet needs and desire - making and installing to make ensure the customer's satisfaction.

Furniture Designer and Cabinet maker

LJ Furniture

Dorset, England
May 2007 - Jun 2009

Furniture design and making, high end one-off for private customers. I worked here in the summers and evenings during taking my design degree i England.

Cabinet Maker

Snekkeriet KanTre AS

Bergen, Norway
Jan 2000 - Jan 2005

Producing furniture, interiors, doors and windows using all sorts of work shop machinery and hand tools. Products at a very high finish were made - timber logs cut into slat wood and then glued together to get stable and nice furniture. Spray painting, oiling and other proffessional surface treatment. Both solid wood, veneer, plywood, MDF, were used such as Oak, Birch, Teak, Mahogny, Pine, Fur, Beech, Ash, Cherry etc.

Education

Bachelor

Arts University Bournemouth

Bournemouth, England
Sep 2006 - Jun 2009

Arts University Bournemouth, established in 1885 as a specialist institution, is a leading University offering high quality specialist education in art, design, media and performance across the creative industries. We remain passionate about our subjects and continue to encourage curiosity, risk-taking and adventure in exploring and pushing subject knowledge and its boundaries.

First - 1.0 (Bestått, meget tilfredsstillende)

Brinckmann Møbelsnekkerverksted

Awards

Design Award

24 Hour Inclusive Design Challenge 2012 - winner of Best Idea

MyWay - In a multidisciplinary team concisting of Product designers, Graphic Designers and Service Designers we designed a digital application that enables a range of users to match their needs to specific locations or create spontaneous days.

Products In Production

Demco® 'Off The Wall' Book Holder

Group together for a striking wall display.
Our exclusive Book Holder was designed for a library display project by graduate designer Stig Stabell.
It is perfect for increasing visibility of those special books to draw the attention of library visitors. The adjustable vertical support displays a single book of different thicknesses or heights and several units can be mounted to make a striking wall display.

Demco® CD Holder

Demco® CD Holder designed by Stig Stabell
Compact display for CDs.
Turn an unused shelf space into an effective display area with this space saving units.
